

# UNITED STATES PATENT AND TRADEMARK OFFICE

UNITED STATES DEPARTMENT OF COMMERCE  
United States Patent and Trademark Office  
Address: COMMISSIONER FOR PATENTS  
P.O. Box 1450  
Alexandria, Virginia 22313-1450  
www.uspto.gov

APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
10/581,739	06/06/2006	Stefan Schneweis	06060	8690
23338 7590 03/28/2008 DENNISON, SCHULTZ & MACDONALD 1727 KING STREET SUITE 105 ALEXANDRIA, VA 22314				
EXAMINER MILLER, MICHAEL G				
ART UNIT		PAPER NUMBER		
1792				
MAIL DATE		DELIVERY MODE		
03/28/2008		PAPER		

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

### Office Action Summary

**Application No.**

10/581,739

**Applicant(s)**

SCHNEWEIS, STEFAN

**Examiner**

MICHAEL G. MILLER

**Art Unit**

1792

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 11 February 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) 1-8 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 9-14 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SE/US)  
Paper No(s)/Mail Date 19 July 2006
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### *Election/Restrictions*

- 1) Applicant's election without traverse of Claims 9-14 in the reply filed on 11 FEB 2008 is acknowledged.
- 2) Claims 1-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11 FEB 2008.

### *Claim Rejections - 35 USC § 102*

- 3) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 4) Claims 9-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Delperier et al (U.S. PGPub 2002/0076491, hereinafter '491).
- 5) With regard to Claim 9, '491 teaches a method for producing a substrate designed to support an object for processing wherein carbon is used as the material for the substrate, and gas outlet or passage openings are formed, interspersed through the substrate, characterized by the following process steps:
  - a) Production of a framework made of carbon and/or SiC fibers (PG0040 teaches a method of making substrates from carbon fibers) and

- b) Stabilization of the framework with a pyrocarbon coating that forms a matrix, such that the stabilized framework has a porosity level that forms the gas outlet or passage openings (PG0086 teaches pyrolytic carbon impregnation; Figures 9, 10, 12 and 13 show that porosity of the substrate is maintained after densification, note the dark spaces exterior to the brighter reflective rings of carbon),
  - c) A framework stabilized in this manner, or a segment of the framework, being used as the substrate (PG0003 teaches that these preforms can be used as supports for crucibles to process semiconductor wafers, which makes it a substrate designed to support an object for processing; a crucible is an object for processing).
- 6) With regard to Claim 10, '491 teaches a method according to claim 9, characterized in that:
- a) The fibers are stabilized by means of vapor infiltration (CVI) (PG0085-0088).
- 7) With regard to Claim 11, '491 teaches a method according to claim 9, characterized in that:
- a) Stabilized felt or non-woven materials, or Stabilized fabric layers are used as the framework (PG0085; carbon fiber plies consolidated in a resin).
- 8) With regard to Claim 12, '491 teaches a method according to claim 9, characterized in that:
- a) The fibers are stabilized exclusively with carbon (PG0086, pyrolytic carbon).

Art Unit: 1792

9) With regard to Claim 13, '491 teaches a method according to claim 9, characterized in that:

- a) The fibers are stabilized with a series of one coating made of carbon (PG0085 – 0088; a series of one coating made of carbon is used to stabilize the fibers).

***Claim Rejections - 35 USC § 103***

10) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11) The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- (1) Determining the scope and contents of the prior art.
- (2) Ascertaining the differences between the prior art and the claims at issue.
- (3) Resolving the level of ordinary skill in the pertinent art.
- (4) Considering objective evidence present in the application indicating obviousness or nonobviousness.

12) Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over '491 as applied to claim 9 above, and further in view of Valentian (U.S. Patent 5,132,145, hereinafter '145) and Carroll et al (5,397,595, hereinafter '595).

13) With regard to Claim 14, '491 teaches a method according to claim 9, except for the following limitation:

- a) The fibers are stabilized with a graduated system of coatings that transitions from carbon to silicon carbide.
- b) '491 teaches forming of a carbon coating before the deposition of pyrolytic carbon (PG0085). However, it does not teach coating with silicon carbide.
- c) '145 teaches coating of a carbon preform used as an integral crucible support. This coating is performed by CVD and uses either carbon or silicon carbide as the coating. (Column 6 Lines 46-66).
- d) Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to have combined the methods of '491 and '145 since both methods teach methods of making CVI-treated crucible supports.
- e) '595 teaches that a graded composition of coating enhances the bond of the fiber to the matrix, producing a more durable preform (Column 2 Line 64 - Column 3 Line 3) and teaches a graded C-SiC coating (Column 5 Lines 26-46).
- f) Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to have modified the method of '491/'145 to produce a graded coating as taught in '595, because '491/'145 wants to produce a densified carbon preform and '595 teaches that a graded densification produces a product with better adhesion of the densification material to the preform.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL G. MILLER whose telephone number is (571)270-1861. The examiner can normally be reached on M-F 7-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Cleveland can be reached on (571)272-1418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
